

Sleep Talking

I wish my mom just snored like a normal person.

When my Mommy (Daddy) gets really tired...she (he) *talks* in her (his) sleep.

Boy she (he) says some really crazy things!

I think it's because of all the scary TV shows she (he) watches.

She (he) should watch TV with me, and then she (he) wouldn't have crazy dreams and talk all night long!

I have tried to tell her (him), but you know what parents are like... they just won't listen! (Wagging finger like parent would to a child).
